

CRITICAL PROJECTS REQUIRE CRITICAL THINKING

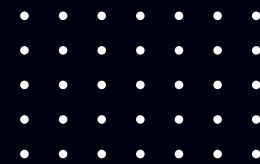

MINING ESTABLISHMENT
AND SHUTDOWN SPECIALISTS

RAM CAPABILITY STATEMENT

RAM Industrial offers full-service solutions for all your industrial equipment needs. Specialising in the sales, rentals, and servicing of generators, lighting towers, compressors, diesel welders, and diesel pumps, we are committed to delivering excellence across various sectors.

Our partnerships with some of Australia's largest mining, industrial, agricultural, construction, and government organisations underscore our dedication to quality and reliability. Whether managing extensive dealer network supply and service arrangements or handling bespoke one-off projects, RAM Industrial has the capacity and expertise to support a wide range of projects, ensuring your operations run smoothly and efficiently.

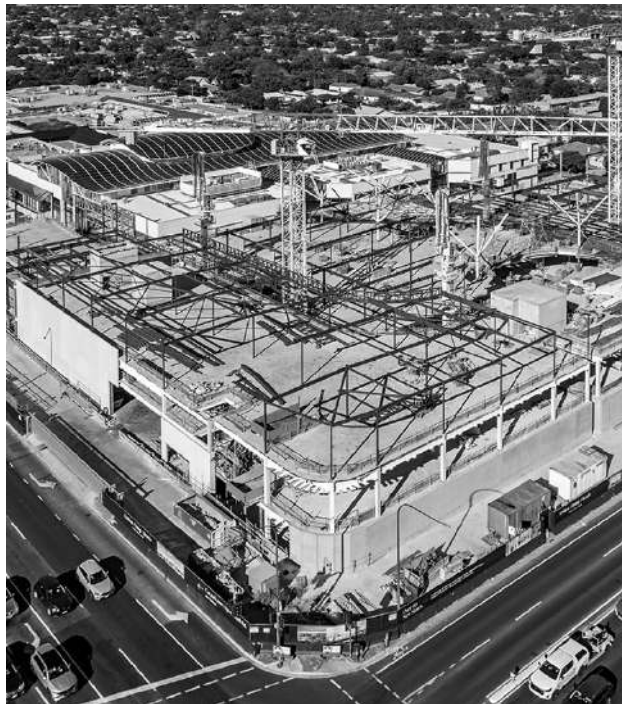

CORE COMPETENCIES

MAJOR SHUTDOWNS

Our engineers are highly skilled professionals capable of executing comprehensive, planned events designed to perform critical maintenance, upgrades, and inspections on essential machinery and equipment. This ensures optimal performance, safety, and regulatory compliance. Our Major Shutdowns services include Dragline Shutdowns, Shovel Shutdowns, and Plant Shutdowns.

MAJOR INDUSTRIAL PROJECTS

As a full-service solutions provider, we offer our clients comprehensive end-to-end support, this includes mining establishment or rehabilitation works, major construction, infrastructure projects, major mining civil works, site power supply and all necessary project equipment. Our goal is to ensure your project starts up and runs with minimal to zero unnecessary downtime.

LABOUR SUPPORT

With our end-to-end solutions, we provide comprehensive labour support to ensure your projects run smoothly and efficiently. Our services cover electrical installations, site installations and commissioning, mobile and fixed plant servicing, and general labour.

EQUIPMENT HIRE WITH AN AUSTRALIA-WIDE NETWORK

RAM boasts an extensive range of specialised industrial equipment and services in the areas of mining and shutdowns. As part of the Viking Group, we also have access to their wide array of products, services, experience, nationwide breakdown support, and product development. This dual advantage enables us to understand client needs and instil trust in RAM capabilities.

WHAT SETS US APART

WE ARE SHUTDOWN AND EQUIPMENT EXPERTS FOR THE AUSTRALIAN RESOURCES SECTOR

Ensuring optimal performance and compliance. We employ mine-specific equipment that meets the stringent safety and operational requirements of the mining industry.

ALL OUR PERSONNEL ARE SITE-INDUCTED

They are skilled personnel who have undergone site-specific training and induction to work safely and effectively on-site.

WE ARE CONNECTED AUSTRALIA-WIDE

As part of Viking Industrial, we have a strong national presence with strategic branches located in the heart of Australia and the West Coast. Backed by Viking Industrial, we can extend these benefits we enjoy to all our clients:

- National rental fleet of over 3,000 assets
- In-house engineering
- In-house and field service electrical, mechanical, and fabrication capabilities
- Complete turn-key power generation packages
- Major infrastructure and mining experience
- On-hand sales stock (up to 1250kva)
- Australian-made, custom-built equipment, independent of engine manufacturers
- National customer support in major project locations

PROVEN SUCCESS

BMA DRAGLINE 13 AT SARAJI MINE

RAM Industrial is the principal contractor for supplying hire plant and equipment for BMA’s Dragline 13 project at Saraji Mine. We cover the entire scope of job requirements and meet all power generation needs to ensure seamless operation and maintenance support.

We provide full pad illumination for night works, generators to power site facility compounds and the dragline house, and mobile power generation. Additionally, we supply two telehandlers with attachments for loading, unloading, and moving parts and equipment on-site, including a specialised 2.5-tonne telehandler designed to operate underneath the dragline tub.

Welders are available for boilermakers to carry out crack repairs and fabrication work. For traffic management, we use variable message boards to inform traffic of major works and caution for turning trucks.

Client
BHP Mitsubishi Alliance (BMA)

OWNER	BHP Mitsubishi Alliance (BMA)
SITE	Saraji Mine
START DATE	May 2024
STATUS	Ongoing
REGION	Bowen Basin, QLD
SCOPE	Scheduled service and maintenance on dragline
